

ANTI SLIP RUBBER PLATES

DAB's anti slip rubber plates are user-friendly and ideal for the active or passive isolation of machines, for the shock damping and the noise absorption. They are easy to use as they can be cut at the desired size and shape just using workshop tools. Generally, to obtain a good result it is sufficient to adapt the cutting of the plate to the shape and size of the machine support or the device to isolate. DAB'S anti slip plates are produced in one single format and are in natural rubber with a hardness of 45-55 Shore.

CODE	ANTI SLIP RUBBER PLATES TYPE			
	Dimensions		Hardness	Load (da N)
	A	B		
300x8	300	8	45° Sh	1000/3000
300x8	300	8	55° Sh	3000/10000
